Thanks for the Memory

For a limited time, get more memory at no charge.

For a limited time, get 1 Gpts memory per channel at no charge with the purchase of any new UXR-Series Infiniium oscilloscope.

The world's most advanced oscilloscope just got better. The UXR-Series Infiniium oscilloscopes provide the highest accuracy, solve problems faster, and support full upgradeability. Now, we provide better signal analysis with deeper memory at no charge.

Adding more capture memory provides incremental visibility to design and signal integrity problems:

- Enhance your troubleshooting and characterizing efforts by capturing "more" for a longer period of time
- Enjoy deeper visibility in both real-time and offline analysis
- Maintain faster sample rate over a constant period of captured time

Deeper memory can help your oscilloscope achieve better measurement and analysis results.
